Informed Consent and Request for Care

I do hereby give my consent to services rendered and provided to me (or the patient named below, for whom I am legally responsible) as a patient of the National University of Natural Medicine (NUNM) Health Centers. I understand that patient care is directed by licensed health care providers who are employees of NUNM. I consent to services rendered to me under the instructions of these professionals, as well as volunteer staff physicians who may be associated for the purpose of consulting.

I recognize that NUNM is a teaching institution. I agree that persons who are students and resident physicians may participate in my care as part of the educational programs of the institution.

I, _____, hereby request and consent to examination and treatment with the providers, students, and affiliated providers at NUNM Health Centers.

I understand I have the right to ask questions and discuss to my satisfaction with the above mentioned providers and/or students:

- My suspected diagnosis(s) or condition(s)
- The nature, purpose, goals, and potential benefits of the proposed care
- The inherent risks, complications, potential hazards, and/or side effects of treatment or procedure
- The probability or likelihood of success
- Reasonable available alternatives to the proposed treatment procedure
- Potential consequences if treatment or advice is not followed and/or nothing is done

Medical and Naturopathic evaluation information:

I understand that medical evaluation and/or Naturopathic evaluation treatment may include, but is not limited to:

- Physical exam (including general, musculoskeletal, EENT, heart and lung, orthopedic, and neurological assessments).
- Common diagnostic procedures (including venipuncture, pap smears, laboratory testing of blood, saliva, urine, and stool).
- Soft tissue and osseous manipulation (including therapeutic massage, deep tissue massage, neuro-muscular technique, naturopathic/osseous manipulation of the spine and extremities, muscle energy technique and cranio-sacral therapy).
- Dietary advice and therapeutic nutrition (including use of foods, diet plans, nutritional supplements, and intravenous vitamin injections).
- Trigger point injection therapy with or without vitamin substances.
- Botanical/Herbal medicines, prescribing of various therapeutic substances including plant, mineral, and animal materials. Substances may be given in the forms of teas, pills, creams, powders, tinctures (which may contain alcohol), suppositories, topical creams, pastes, plasters, washes, or other forms.
- Homeopathic remedies (highly diluted quantities of naturally occurring substances).
- Counseling (including but not limited to visualization for improved lifestyle strategies).
- Over-the-counter and prescription medications (including only those medications on Formulary of Oregon Naturopathic Physicians with regards to ND's).
- Hydrotherapy procedures which may consist of hot and cold water, baths, sauna, ice, towels and/or sheets and/or hydrocollator packs either heated or cooled, electrical stimulation, ultrasound and diathermy, and other therapies. Possible risks associated with and complications associated with this procedure may include:
 - Mild skin burns or irritation

Informed Consent and Request for Care (Part 2)

- Overheating
- Contact dermatitis
- Dizziness
- Temporary decrease in blood pressure
- Classical Chinese medicine procedures including, but not limited to acupuncture, moxibustion, cupping, electro-acupuncture, herbology, and massage. I understand that some herbs may be inappropriate during pregnancy. **If I suspect I am pregnant, I will immediately inform my provider or student.** Possible risks and complications associated with these procedures may include:
 - Slight burns
 - Tingling near the needling sites that may last a few days
 - Nausea
 - Infections and blisters
 - Fainting
 - Scarring
 - Bruising
- Physical medicine treatments including examination, diagnostic procedures, manipulation and/or mobilization of the neck, spine, and extremities involving movement of the joints and soft tissues, and soft tissue therapies (specifically: manual soft tissue therapies, instrument-assisted soft tissue mobilization (IASTM), percussion/vibration therapy and therapeutic tape procedure). Physical therapy, including exercise, electrical stimulation, hot/cold therapies, ultrasound, diathermy, TENS units, low-level laser therapy, traction, and other therapeutic modalities recommended for my condition may also be used. Possible risks and complications associated with these procedures may include:
 - Soreness
 - Muscle spasms
 - Temporary increase in symptoms
 - Mild to moderate bruising
 - Sprains and strains
 - Dizziness
 - Fractures/joint injury
 - Stroke (has been rarely reported to occur specifically from neck manipulation)
 - Physical Therapy burns (rare)
- Intravenous (IV) Therapy treatments including drips, pushes, and oral & IV chelation (heavy metal detoxification). This treatment involves inserting a needle and injecting a standardized formula into veins or muscles. There may be some discomfort at the site of treatment and it is my responsibility to inform the NUNM student or physician of any burning, pain, or negative reactions that I may be experiencing. During treatment, it is possible for the fluid to leak out of the vein into the surrounding tissue. I understand that although this infiltrated fluid may cause pain, it is not dangerous to my health and my body will absorb the fluid. I realize that during and after my treatment I may experience temporary discomfort at the site of treatment. There is no stated or implied guarantee of success or effectiveness of any specific treatment. I am free to withdrawal my consent or participation in these treatments at any time.

Informed Consent and Request for Care (Part 3)

Advantages of IV Therapy:

- Not affected by stomach or intestinal disease
- Total amount given is available to tissues requiring the constituents
- Force nutrients into the cells by means of a high concentration gradient despite low energy due to illness
- Give doses of nutrients higher than those possible by mouth without intestinal irritation

Possible risks and complications associated with these procedures may include:

- Pain, bruising, or infection at injection site
- Inflammation of vein used for infusion (phlebitis)
- Severe allergic reaction or anaphylaxis, resulting in cardiac arrest, possibly death

Alternatives to IV Therapy include:

- Oral supplementation
- Lifestyle and dietary changes
